### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interviews with Thomas Otterlee on 3/18/2005 and on 6/15/2005. For the sake of clarity, the Examiner's Amendment of 3/18/2005 is hereby canceled.

The application has been amended as follows:

On p. 19, in the Abstract, l. 9 of the page, "aperture to" has been changed to -- aperture directly to - -

On p. 2 of the description, l. 18 of the page, "aperture to" has been changed to -- aperture directly to - -

On p. 14, Claim 1 has been amended as follows:

On l. 10 of the page, "second flow path;" has been changed to -- second and substantially unobstructed flow path; --

on l. 15 of the page, "path." Has been changed to -- path; the first flow path and the second flow path sharing a common exhaust aperture. --

On p. 16, Claim 10 has been amended as follows:

On l. 1 of the page, "suited for use" has been changed to -- in combination --;

On l. 5 of the page, "housing, and a second aperture" has been changed to -- housing directly from the recuperator, and a second and substantially unobstructed aperture --

On p. 18, Claim 18 has been amended as follows:

On l. 8 of the page, "device;" has been changed to -- device, and the remaining portion of the flow to a substantially unobstructed exhaust; --

On l. 9 of the page, "the flow" has been changed to the -- the desired portion of the flow --

On l. 12 of the page, "temperature." Has been changed to -- temperature; wherein the flow of fluid exhausts through said exhaust regardless of the position of the control member. --

***Allowable Subject Matter***

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance: prior art does not teach in combination with the other limitations of the independent claims the method and the apparatus for practicing said method, comprising a flow conduit having one inlet and one outlet, and two selectable flow paths, one of them comprising a heat exchanger and the other being unobstructed. Regarding claim 10, patentable weight was given to the preamble, in particular "(micro)turbine engine" (the patentable weight was given to "turbine"), because it breathes life and meaning into the claim through the fact that its flow of exhaust gas is later claimed in the body of the claim. In other words, the claimed "exhaust gas" must originate from a turbine engine.

The limitation "aperture" was construed in the broad three-dimensional sense:

Main Entry: **ap·er·ture** 

Function: *noun*

**1** : an opening or open space : HOLE

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Foote 2869324, Pfenninger 2499108.
